## New Hampshire Facility Achieves ISO13485 Certification

### All Major EMS Facilities Accredited for Medical Assembly

CTS Electronics Manufacturing Solutions' (EMS) New Hampshire facility has achieved ISO13485:2003 certification, bringing the total number of EMS facilities accredited to seven and extending the medical capabilities of CTS to all major sites worldwide.

ISO13485:2003 is the international quality management standard for designers and manufacturers of medical devices. CTS has actively pursued this certification as part of an ongoing global quality roadmap to meet the needs of customers in the high reliability, high

technology medical sector.

Don Schroeder, President of EMS, commented, "We have now achieved four ISO13485 certifications in less than twelve months. This remarkable achievement demonstrates our commitment to customers in this high reliability, highly complex industry. Certification in New Hampshire means that we now offer comprehensive medical manufacturing support at all of our site in the United States as well as in the UK, China, Singapore and Thailand."

CTS is a major provider of medical products and services to a range of customers worldwide. With ISO13485 and FDA accredited facilities, IPC Class III build and extensive experience of regulatory and clinical trial management, CTS offers a comprehensive service to medical OEMS, from the earliest

stage involvement (ESI) through production ramp up, volume assembly and post manufacturing support.

CTS New Hampshire is an 80,000 sq ft facility in Londonderry offering printed circuit board and backplane assembly, as well as fully integrated box build solutions, test engineering, program management and NPI support.
